• **Relevant Substance:**

Name	CAS No.	Weight (%)
Ammonium hydroxide solution	7664-41-7	25

Although this adjuvant has been extensively tested under a large variety of conditions, the registration holder does not warrant that it will be efficacious under all conditions. The active ingredient may be affected by factors such as storage conditions, quality of dilution water and compatibility with other substances not indicated on the label, as well as by the method, time and accuracy of the application. Furthermore, the registration holder does not accept responsibility for damage to crops, vegetation, the environment, or harm to man or animal, or lack of performance of the adjuvant concerned, due to failure of the user to follow the label instructions or to the occurrence of conditions which could not have been foreseen in terms of the registration. Consult the supplier in the event of any uncertainty.

PRECAUTIONS:• **GHS Precautionary Statements:**

Tank Man is a product formulated to inactivate and remove deposits and residues that adhere to tanks and equipment of industrial applicators that utilize chemical products.

DIRECTIONS FOR USE:

- SHAKE BEFORE USING.
- Use only as indicated on this label.
- Once tank is empty, fill 10-20% of the tanks volume with clean water and start agitation.
- Add 250 ml Tank Man/100 L of water and continue to agitate.
- Move the water tank forward and backwards until the water has washed the inside of the tank.
- Ensure all the pipes, nozzels and filters are cleaned and rinsed thoroughly.
- Empty the tank and rinse it at least twice with clean water.
- If necessary repeat the treatment.
